## Introduction

Galaga is one of the most exciting games in the arcade world. Gibbonga, provides you the same exciting, fun experience but with you all the time. This is a computer based version of the well known Galaga.

This is a one player game, the player is the pilot of a nice space ship. This space ship will be attacked by enemies, strong, moving and shooting ones.

The pilot job is to defend his planet against those enemies. The space ship can move left and right, and shoot up toward enemies. When enemies hit the ship, the ship lives will decrease by one. Player has three lives, when he lose them all, the game will be over, otherwise the player will win.  
Best wishes in saving your plant from attackers.

## System Requirements

- This game has been made by Python and Pygame.
- Python version: 3.7.1
- It can run on Windows and Mac operating systems.
- All you need to play the game is having python3 and Pygame in your machine.
